

BLUE BUCKS ADVENTURES

SPRING 2016

BLUE BUCKS FLYER PAPER AIRPLANE

Hey, kids! Ready to get started on your very own Blue Bucks Air Force? Take the printed insert from this issue and unfold it. Flip it over to the blank side making sure that the yellow half-circle on the other side is at the top. Now fold the 2 upper corners in so that they meet at the center fold line. It should look like photo #1. Next, fold the 2 sides in again so they meet in the center. The dotted line shows where the fold will be. It should now look like photo #2. Now fold the 2 sides together at the center, so it looks like photo #3. Next, fold the sides down at the dotted lines to form the wings. The lines are on both sides to help guide you. It should now look like photo #4. Finally, attach a paper clip to the bottom edge to give your plane some weight. By adjusting the paper clip, you can get your Blue Bucks Flyer to zip across the room like an arrow!

BLUE BUCKS ADVENTURES

How are all you Blue Bucks savers doing out there? Spring has flown by and the Blue Bucks gang and I are getting ready for a summer full of activities. I bet you'll be doing all kinds of fun things this summer too. Riding bikes, playing in the yard with friends and planting a garden with family are just a few of the good times you can have. With school out and all summer to play, don't forget about saving in your Blue Bucks account. There may just be something fun this summer for Blue Bucks savers, so stay tuned!

To get your high flying summer off the ground, we thought you'd enjoy building the enclosed Blue Bucks Flyer. With help from an adult, carefully follow the included folding directions. Pretty soon your Blue Bucks Flyer will be off and soaring, just like your summer!

Until next time,

Milo
