

BLUE BUCKS[®]

ADVENTURES

SPRING 2021

BLUE BUCKS[®]

ADVENTURES

Hiya, Blue Bucks[®] kiddos!

I hope you have dusted off your piggy bank and counted your coins because with the warmth of spring, money-making opportunities can come into bloom! Small chores like cleaning up your toys, organizing your backpack and even taking out the trash could earn you a few bucks - and maybe a few brownie points as well!

My good buddy Earnie rides his bicycle through his neighborhood delivering newspapers for a few bucks. He says it's a fun way to make money while staying active. But between you and I, the real reason he enjoys it is because he gets to show off his flashy ride! His bike has every bell, horn

and whistle you can imagine, and then some! Earnie wanted to share with you some instructions for a Blue Bucks Bike Noise Maker to get you cruising to your local CapFed[®] branch in True Blue[®] style.

Using the instructions on the enclosed insert, and the ones found at capfed.com/bluebucksfun, you can construct as many noise makers as you'd like. For every \$10 Earnie makes delivering papers he adds one Noise Maker to his wheel. This is good practice for keeping track of money you earn, and acts as a good reminder to keep growing your savings every time you hop on your bicycle!

Until next time!

Milo

BLUE BUCKS BIKE NOISE MAKER

A fun way to rev-up your bicycle

Just cut out the noise maker from this sheet and wrap it around the front or back frame of your bike close to the outer edge of the wheel. You can use a clothespin or some other type of clip to keep it in place. You may even use some tape, if you'd like. Adjust to make sure the noise maker reaches the spokes. Now you're ready to ride!
